## PROJECTS

### RentifyCars

[Live Website](#) | [Client-Side](#) | [Server-Side](#)

RentifyCars is a modern, user-friendly car rental platform designed to make the car booking process smooth and secure for both customers and rental service providers.

- Implemented secure user login using **Firestore Auth** and protected private routes with **JWT tokens**.
- Enabled **car management system** (Add, Update, Delete) for logged-in users, linked with their unique profiles.
- Developed **real-time car booking** functionality with instant availability updates using Express.js and MongoDB.
- Built a **fully responsive UI** using **React** and **Tailwind CSS** for seamless experience across devices.

**Technology:** Vite, React.js, Tailwind CSS, Daisy UI, Firestore , JWT, Express JS, MongoDB

---

### Plant Care

[Live Website](#) | [Client-Side](#) | [Server-Side](#)

A full-stack web application designed to help users manage their indoor and outdoor plants. And detailed plant care info, it's your smart assistant for keeping your greenery healthy.

- Secure User Authentication – Register and log in with Firestore Auth to manage personal plant data.
- Plant Management (Add, Update, Delete) – Easily track your plants with full CRUD functionality.
- View Recently Added Plants – Instantly see the latest plants you've added to your collection.
- Comprehensive Plant Details – Store and access care level, watering frequency, sunlight needs, and more.
- Mobile-Responsive Interface – Seamless user experience across all devices using Tailwind CSS.

**Technology:** Vite, React.js, Tailwind CSS, Daisy UI, Firestore , Express JS, MongoDB
